You control access — revoke it anytime in iOS Settings

WHAT IT DOES FOR YOU

Three things Journey Tracker does, every day.

Built for the practical questions: What do my labs mean? Am I consistent with my treatment? How far have I come?

Understand your lab results over time

Log each blood test — HbA1c, cholesterol, metabolic markers — and watch your trends across months of treatment. Walk into your next appointment with your full lab history organized and visible.

Stay consistent with your treatment

Log each dose, track how your body responds, and keep a symptom record that's accurate when your doctor asks. No more trying to remember what happened three weeks ago.

See how far you've come

Weight trends, milestone markers, and streak data — organized over time. Seeing your progress clearly is part of staying motivated to continue.

HOW IT WORKS

Your whole health picture, one step at a time.

Journey Tracker keeps everything in one organized place so you can focus on the journey, not the paperwork.

STEP 1

Log or import your data

Add a weigh-in, record a lab result, or log a dose in seconds. Import from Apple Health or type it in manually — Journey Tracker keeps everything in one organized place.

- ✓ HbA1c, LDL, cholesterol, and 20+ biomarkers
- ✓ Calendar view shows exactly when each test was taken
- ✓ Trend charts reveal how labs shift as therapy progresses
- ✓ AI-powered lab analysis available with Pro subscription

STEP 2

Review your trends

Charts and calendar views show what's changing — and when it changed. Weight, body fat, BMI — track every metric over any time range and watch the picture come together.

- ✓ Weight trend charts from 1 week to all time
- ✓ Body fat percentage and BMI tracked alongside weight
- ✓ Milestone badges you can share (down 5, 10, 25 lbs and more)
- ✓ Every weigh-in logged to the day — never lose your history

STEP 3

Track your treatment

Dose history, escalation timelines, and how your weight responds at each stage — all in one place. Know exactly where you are in your protocol, and have an accurate record ready for your next appointment.

- ✓ Log medication name, dose, injection site, and notes
- ✓ Dose timeline and weight-vs-dose correlation charts
- ✓ Recurring reminders so you never miss a dose
- ✓ Supports Zepbound, Ozempic, Wegovy, and more

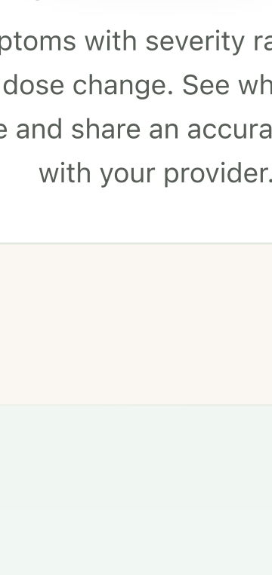
STEP 4

Celebrate how far you've come

Every milestone is captured automatically. Generate a shareable before-and-after card, see your streaks build week over week, and walk into every appointment knowing exactly what you've accomplished.

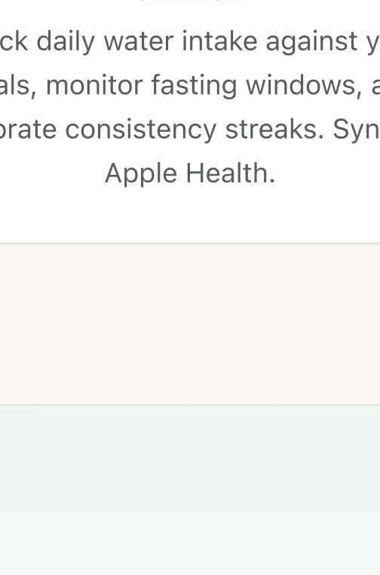
- ✓ Before & after photo comparison built in
- ✓ Shareable milestone cards — down 5, 10, 25 lbs and more
- ✓ Dose streak and weight streak tracking keeps you consistent
- ✓ Your full journey history, always in your iCloud

Also built in



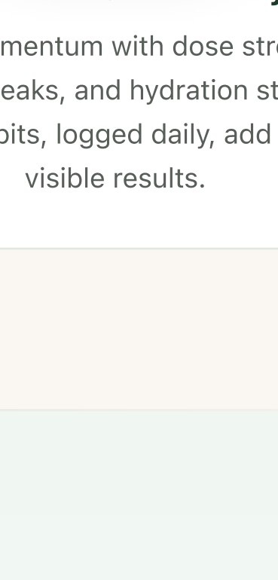
Symptom Tracking

Log symptoms with severity ratings linked to each dose change. See what resolves over time and share an accurate summary with your provider.



Fasting & Hydration

Track daily water intake against your goals, monitor fasting windows, and celebrate consistency streaks. Syncs to Apple Health.



Streaks & Consistency

Build momentum with dose streaks, weight streaks, and hydration streaks. Small habits, logged daily, add up to visible results.

FAQS

Questions & answers

Everything you need to know before you start your journey.

- What is Journey Tracker and who is it for?
- Do I need to be on GLP-1 medication to use Journey Tracker?
- Where is my data stored? Is it in the cloud?
- How does Journey Tracker use Apple Health?
- Is my information shared with my doctor, employer, or insurer?
- Is there a free version? What's included in Pro?
- Does Journey Tracker give medical advice?

PRIVACY

Your health information stays with you.

Journey Tracker was built so your most personal data stays exactly where it belongs — with you.

On your device & your iCloud
Your data is stored locally and synced to your personal iCloud account via Apple's CloudKit. We cannot access your health records — there is no Journey Tracker server database.

No advertising. No data sales.
We do not use advertising trackers, analytics SDKs, or third-party data brokers. Your data is never sold, rented, or traded for any purpose.

HealthKit is always your choice
You decide what Journey Tracker can read from Apple Health. Revoke any permission at any time from iOS Settings → Privacy & Security → Health → Journey Tracker.

Not medical advice
Journey Tracker is a personal tracking tool, not a medical device. Nothing in the app constitutes medical advice. Always consult your healthcare provider about your treatment and health decisions.
